Full Stack Web Developer using the MERN stack. Experience developing custom, interactive, and responsive web applications after completing the UA Coding Bootcamp. Currently seeking a role as a Developer in a collaborative, cohesive, innovative environment where I can apply and extend my technical and web application development skills.

Technical Skills

- | | | | |
|--------------|-------------|---------------|-----------------|
| • HTML | • React | • MySQL | • Git |
| • CSS | • Redux | • MongoDB | • Cheerio.js |
| • JavaScript | • Node.js | • Heroku | • Axios |
| • jQuery | • Express | • Passport.js | • Handlebars.js |
| • CSS Grid | • Bootstrap | • Sass | • AJAX |

MediCab- <https://frozen-wave-55823.herokuapp.com/>

- Full MERN stack application built from scratch as a web app that lets you manage your prescription so that you know what, when, and how much you are taking. Also, it lets you search the FDA database for information of the drug.
- Utilized HTML, CSS, JavaScript, Node, Express, Bootstrap, and Heroku

Spirit Animal Connection- <https://mwilliam0104.github.io/Project-2/>

- Full MERN stack application built from scratch as a project
- developed a product where like-minded individuals can meet in a fun environment without the pressure and stigma of apps like Tinder and Bumble.

Education

The University of Arizona – Chandler, AZ

10/2018 – 1/2019

UA Coding Bootcamp – Full Stack JavaScript Web Development

- 24-week Web Development course that provided me with the skills necessary to build modern webapplications
